EXPERIENCE AND EXPERTISE

Mark Henderson joined Keith Borer Consultants in 2012 as a Digital Forensic Investigator. Within that time, he has specialised in the extraction and examination of data from mobile telephones / tablet computers and other digital devices, such as satellite navigation devices and digital voice recorders. This has included considering GPS data from a variety of sources including multimedia files, mobile telephone activity log files, satellite navigation devices and vehicle tracking systems. He now specialises in the interpretation of tachograph and vehicle telematics data (including GPS).

Mr Henderson has prepared over 375 reports for cases in England, Wales, Northern Ireland, Republic of Ireland and further afield. He has prepared reports for criminal (including military courts martial), immigration, civil, family, Police disciplinary hearings and Standards in Public Office investigations.

Mr Henderson graduated from Durham University with a First-Class Honours degree in Computer Science and is a Member of the Institution of Engineering and Technology. He has undergone further training covering various aspects of digital forensics and the following in relation to the calibration and analysis of analogue and digital tachograph recording systems:

- Digital Tachograph Analysis
- Drivers' Hours & Road Transport (Working Time) Regulations

Keith Borer Consultants operates a Continuous Professional Development Scheme for all staff. Within this scheme Mr Henderson undertakes regular training and development in the field of Digital Forensics and Tachograph Analysis, including attending conferences and relevant training courses.

In addition to casework, he is the technical author for the validation of our in-house scientific methods for the examination of mobile telephones and tablet computers.

Mr Henderson has presented to solicitors and barristers around the UK on various topics, including mobile telephone examination and cloud computing.
