

Adrian P. Armstrong LCGI AAE MITAI MIMI
Personal Qualifications and Experience

Mr Armstrong has investigated many hundreds of fatal and multiple-vehicle collisions, including pedestrian, bicycle, HGV, bus, coach and motorcycle collisions and regularly gives evidence in both the Civil and the Criminal Courts.

He is a specialist Forensic Collision Investigator and Vehicle Examiner and is licenced to drive most classes of road vehicles including cars, motorcycles, HGVs, coaches, buses and track-laying vehicles.

He is experienced and qualified in CCTV speed analysis, the correct use of various speed detection devices, Tachograph analysis and other technical areas.

Mr Armstrong has been employed in forensic collision investigation since 2002 and qualified as an advanced Forensic Collision Investigator in 2006. He served for 17 years with the Metropolitan Police where he was a Senior Forensic Collision Investigator, before joining Keith Borer Consultants in 2016.

His areas of expertise include:

- Forensic Collision Investigation to advanced level
- Vehicle examination of cars, motorcycles and all classes of HGV/PSV
- Analogue and Digital Tachograph examination, calibration and analysis
- Forensic tyre examination and Anti-lock brake diagnostics
- Calculation of vehicle speed by CCTV analysis
- Examination and identification of stolen vehicles and components

He has attained the following:

- Certificate of Higher Education (with merit) in Forensic Collision Investigation
- Licentiate of the City & Guilds of London in Traffic Accident Investigation
- Advanced Automotive Engineer in Vehicle Examination
- Class 1 advanced police driving certificate
- Police response motorcyclist
- Membership of the Institute of Advanced Motorists and Motorcyclists
- Membership of the Institute of the Motor Industry
- Membership of the Institute of Traffic Accident Investigators

Keith Borer Consultants operates a Continuous Professional Development Scheme for all staff. Within this scheme Mr Armstrong undertakes regular training and development in the field of Forensic Collision Investigation, including attending conferences and relevant training courses. Mr Armstrong and his colleagues maintain an updated library on forensic accident investigation techniques and research, and on current case law relating to expert evidence.
